

# Case study

## Government

### Guiding government in infrastructure modernisation

High level strategy paves the way for IT transformation

#### Challenge

- Provide strategic advice and guidance in a narrow time frame regarding cloud and workspace transformation programmes, triggered by office relocation that would otherwise require support for double the number of staff desktops
- Provide indicative programme and project budgetary estimates

#### Solution

- Utilised EA and MSP methodologies
- Led key stakeholder workshops and interviews
- Produced high level view on current state of existing solutions
- Presented marketplace review and cloud strategy options
- Defined and agreed high level future state target, and provided details of the projects that would need to be executed to get there

#### Result

- Customer achieved a clear understanding of future target state of their IT and was able to confidently undertake an IT transformation programme
- Documented, supportable roadmap and framework to deliver the goals, including budgetary costs

#### Customer

This government department is responsible for education and children's services in England. The department's 2,300 staff work from ministerial offices in London and in a number of other locations around the UK.

**Xtravirt** is a leading, independent provider of enterprise virtualisation solutions. We deliver data centre, workspace and cloud transformational solutions to clients across public and private sectors, both in the UK and internationally.
