

# IT transformation strategy services

## At a glance

Aligning business and IT goals is key to the creation of a successful IT strategy, and knowing what to consider and how to measure it is essential to reducing cost and improving efficiency.

Xtravirt's IT transformation strategy services for data centres, cloud and workspace enable organisations to formulate pragmatic IT transformation strategies and gain control of their roadmap.

Xtravirt works with you to:

- Understand and evaluate your IT objectives against business goals
- Identify barriers, uncover opportunities, and benchmark against industry peers
- Establish and define financially viable solutions
- Develop a future state roadmap and action plan

## Approach

Our experts work with your stakeholders, IT teams and lines of business to develop a comprehensive strategy, roadmap and action plan for your transformation.

## Benefits

Our expertise together with technology evaluation, process optimisation and value modelling, provides a strategic vision which delivers measurable business benefits:

- Clear and unified vision of the current IT landscape, enabling key decision-making
- Actionable model for data centre, private/hybrid cloud and workspace transformation
- Foundation for aligned strategy to drive change and maturity, and accelerate time to value

## Services

Xtravirt offers 3 unique IT strategy services to suit any organisation's transformation needs, from a simple maturity assessment to the development of a comprehensive business case.

### Strategy Accelerator Services

Rapid assessment of current environment and IT transformation strategy, together with a technical audit which provides high level guidance and validation

### Strategic Planning Services

Detailed analysis and future state modelling to define the key foundations of an IT strategy

### Transformation Enablement Service

Comprehensive business case to build a definitive strategy, including people, process, technology and finance

## Deliverables
